

# KITCHENER-WATERLOO Perl Mongers

For enthusiasts of the Perl programming language

## Topic: Perl Modules: A Look Under the Hood

In Perl, a module is the basic unit of code-reuse. The talk will be mostly a look into `GD::Text::Arc`, a module written to draw TrueType text around the edge of a circle. The talk will consider:

- using and writing object-oriented perl code
- the Virtue of Laziness: or, reusing other peoples' code.
- writing tests while coding
- beer coasters

Date/Time: **Wednesday the 18th of February, 2004 at 7pm**

Location: University of Waterloo Bioinformatics Lab,  
Davis Centre room 2305

For directions and a map, please check our FAQ:  
<http://kw.pm.org/faq.html>

After the meeting we will adjourn to Morty's for drinks.

Parking: The closest legal parking is probably the 'B' lot, which has public parking after 4pm for \$2 (coin only). The entrance is on Phillip Street, just after the University Plaza going East on University Ave.
